

Scalability & Future Plan

Date	15 July 2026
Team ID	SWTID-2026-1518
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited dataset size affects prediction accuracy.	Medium	High
2	Supports only a single machine learning model.	Medium	Medium
3	No real-time integration with bank databases.	High	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users.	Deploy the application on a cloud platform with auto-scaling to handle more users.
2	Data Storage	Uses a local dataset.	Store data in a secure cloud database to manage larger datasets efficiently.
3	Performance	Prediction speed is suitable for small datasets.	Optimize the machine learning model and use faster processing techniques for real-time predictions.
4	Security	Basic login and data handling.	Implement encryption, secure authentication, and role-based access control to protect user data.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Develop a web application with a user-friendly interface.	2 Months	Easier access for users and bank staff.
Phase 3	Integrate with bank APIs for real-time credit card approval.	4 Months	Faster and automated approval process.
Phase 4	Add Explainable AI (XAI) to show reasons for approval or rejection.	6 Months	Increased transparency and user trust.
